Ted,

The Division is requesting concurrence from the BLM on the bond adjustment for the Colorado Plateau Partners/Energy Fuels Sage mine, DOGM permit S/037/0058, to combine the exploration permit, E/037/0188 with the existing small mine permit.

The current bond for the sage mine is \$20,800, and the bond held for the exploration project is \$15,640. The combination of the bonds for both permits is \$36,440.

The mine permit was due for escalation in 2012. The bond required for the adjusted combined disturbed area acreage after escalation is \$30,200 for three years, or \$30,900 for five years. This provides an excess amount of bond in place of either \$6,240 for the three year option or \$5,540 for the five year option.

Also, we have no BLM lease numbers in our database for the Sage mine or the exploration project. Can you let us know what those are?

If you have any questions or need any more information, please let us know.

Thanks,

—

Mike,

The BLM concurs with the Division's 3-yr and 5-yr escalation estimates for the Sage Mine project. The BLM #s are: Monitoring Wells (UTU-74647); Sage Mine project (UTU-69788). I am preparing response ltr to company and will copy you.

Thanks
